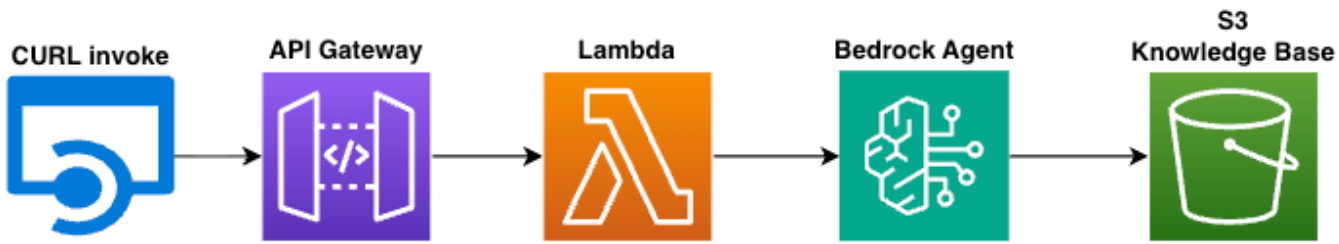
Building an AWS AI Chatbot in 45 Minutes with CDK

Me

- Jon Kelly
- Amazon Software Development Engineer
- 4 years of experience
- Iowa State alumni

The Goal



CURL invoke
API Gateway
Lambda
Bedrock Agent
S3
Knowledge Base

What do those symbols mean?

Over 200 different services within AWS

CloudFormation

API Gateway

Dynamo

Lambda

Kendra

ECS
Elastic Container Service

Bedrock

S3
Simple Storage Service

CloudFront

IAM
Identity and Access Management

Bedrock

- AWS platform for running LLMs
- Agent and knowledge base configuration

S3

- Folder on the cloud
- Can store anything

Lambda

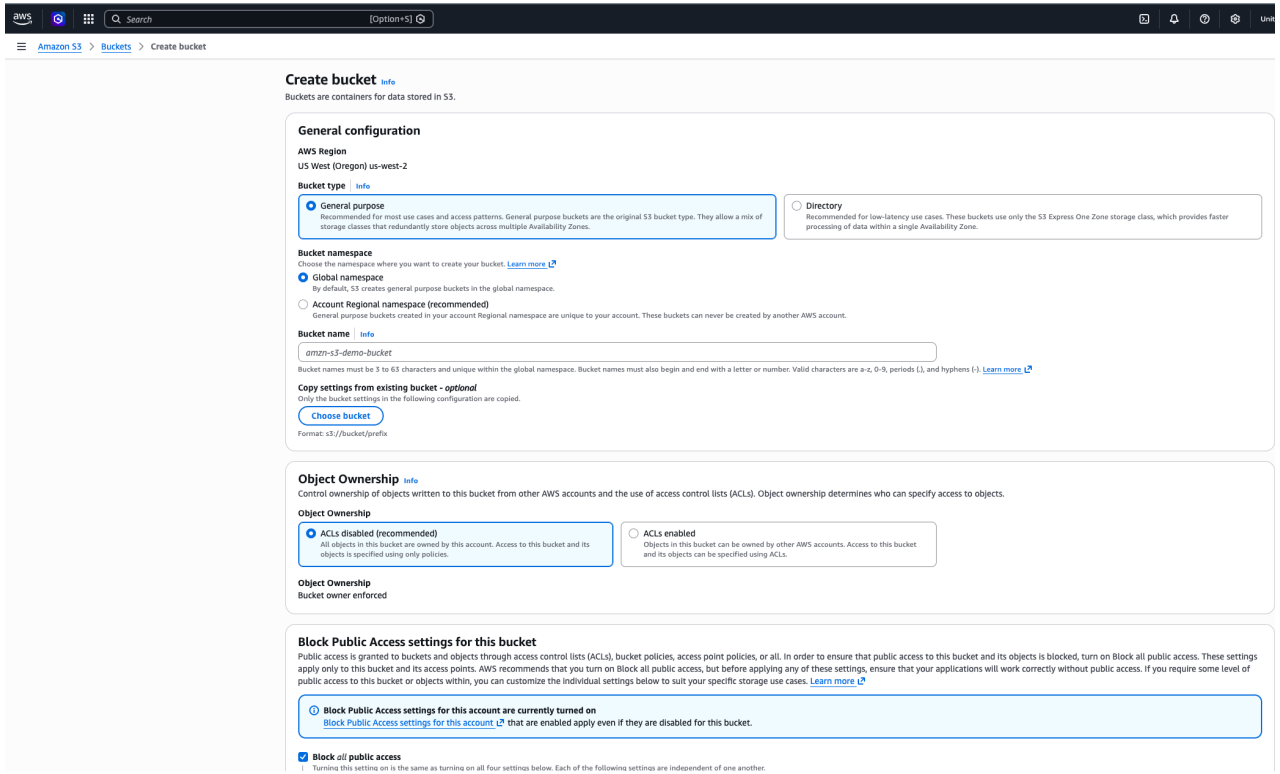
- Short lived server set up by Amazon
- Self scaling

API Gateway

- Maps HTTP requests to a lambda
- Can’t call the lambda directly

Using AWS services

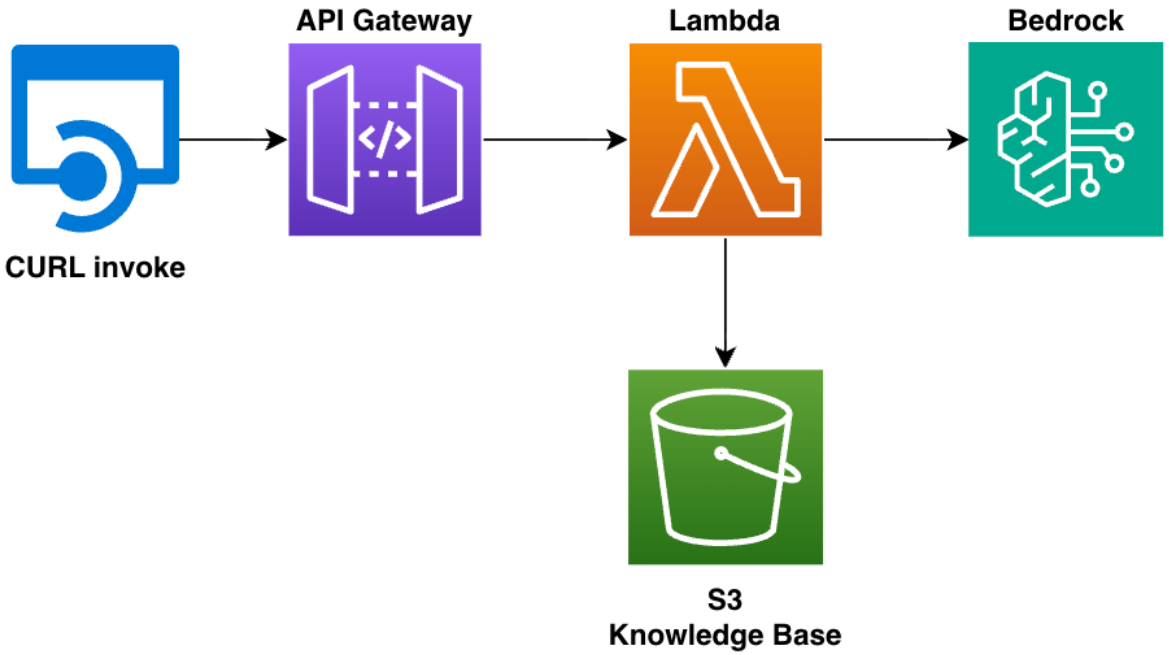
- Create via console or with code (Cloud Development Kit)

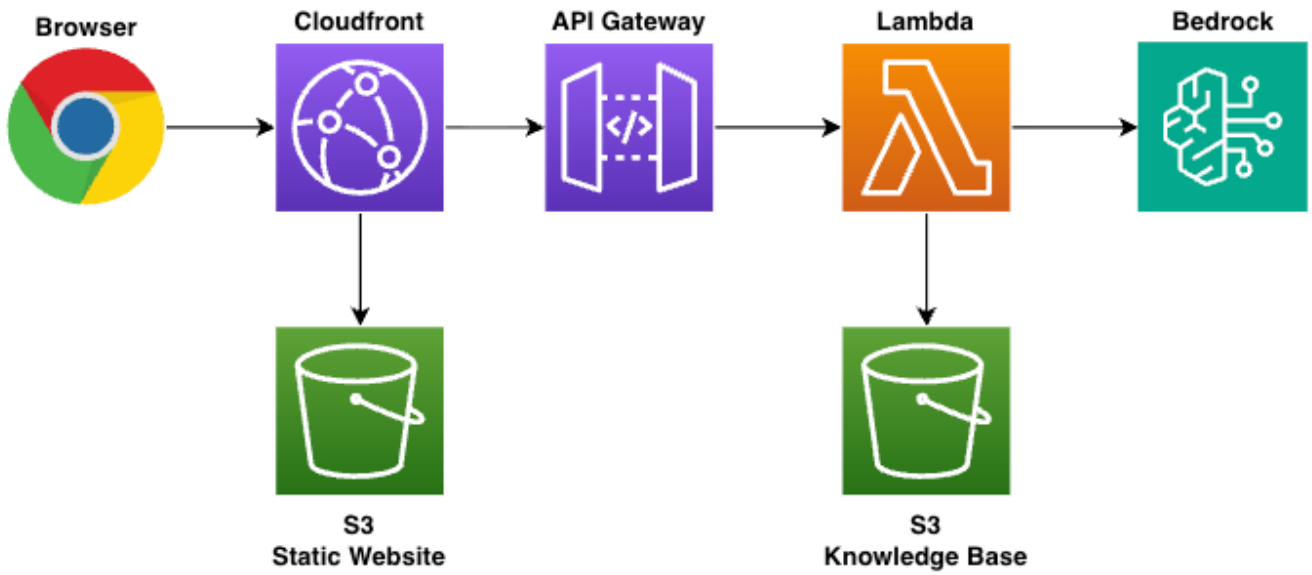


Why Infrastructure as Code

- Version Control
- Reproducible
- Dependency ordering
- Build with speed using AI

Quick Clarification



Let’s Build It


The Stretch Goal
